

Visions for Harmonised Digital Collections

prerequisites, integration, migration, challenges

prerequisites

- **Content**

Format / Standards / Conventions -> Individual Purpose

easy data transfer -> (dynamic) adjustments

Size / Large -> Medium -> Small

manual / automated adaptations & cleaning

Relevance / Global -> International -> National -> Regional -> Local

- **Structure**

objects (entities) / processes

integration

- Lookups & External Services

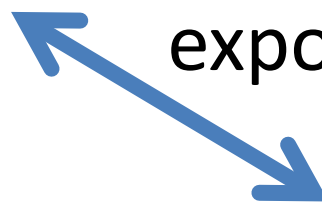

Persons / (Sci)Names / Classifications / GeoNames
Objects & Context / Descriptions

- Standards / Domains

FOAF / ? / TCS / ISO / OGC
ABCD & DwC Archive / ??

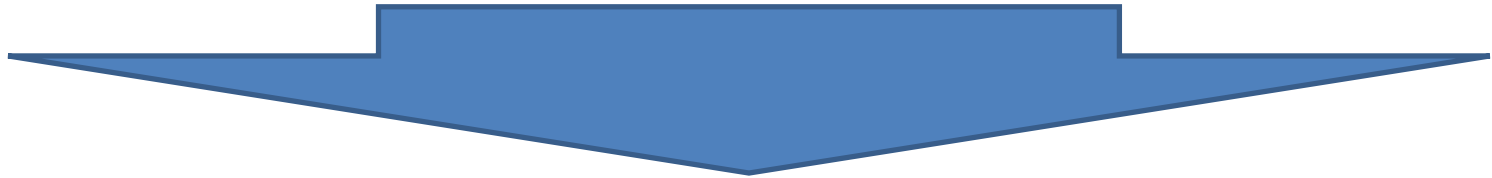

migration

- Multiple Systems

export / tolerance

- Projects / Spin offs / Derivatives

Consolidated System

import / (in)tolerance

challenges

- strategies -> decisions -> implementation(s)
- moving targets / classifications & taxonomies
- granularity / precision / revision
- processing & handling time
