DK: Nikolaj Scharff, Martin Stein, Thomas Stjernegaard Jeppsen, David Konrad

Tuesday 9th of June

DK-team arrives at 9.20 Arlanda

10.00-11.00

- Python scripts for import/export, csv.files – Markus E (the script does not include import/export of the trees Taxonomy, Geography and Storage, they need to be loaded separately). Future use: The scripts could also be used to load data into the DINA virtual appliances.
- Introduction “DINA Data Tool” Thomas and David – Description of work flow. Data cleaning tool for curators, database managers are using the Specify workbench to load data.
- “DINA Archive” – Markus S target group: advanced database administrators “data wranglers” working with migrations from other database systems to Specify database.

11.00-12.00

- “DINA Data Tool” vs “DINA Archive”, discussion on how these two tracks complement and/or overlap each other?
- How tightly coupled is the DINA Data Tool to Specify? Calls over API:s?
- Google/Open refine as a complement?
- DINA-look-n-feel on the UI?
